“Engineering Career Overview”

for Recently Graduated Engineers

Introduction

The recently graduated engineer will be required to know about matters related to professional practice which are not usually dealt with during the academic time. He will be required to know about matters related to engineering practice, rules and regulations, both locally and internationally. In addition, he must work on improving the personal skills to support him in the development of professional career. This course will provide the recently graduated engineers about an overview of engineering practices and essential work skills to be acquired.

Objectives & Benefits

1. Introduce recently graduated engineers and architects to engineering profession, requirements and required job skills
2. Introduce the participants to nature of engineering practice market and requirements.
3. Aware the participants with ethics in Engineering.
4. Introduce the participants with the day to day skills required in their job to enhance the productivity, communication and various essential skills.

Methodology

The course will be conducted in a workshop style where interaction will be required between the lecturer and the participants. Reference shall also be made to real examples supported by lecturer's wealth of experience in engineering profession and management fields.

Who Should Attend?

Recently graduated students in any field of engineering, architecture, and relevant disciplines who have graduated since maximum of three years.

Others students who think that they can benefit from the programme can also attend.

Course Lecturer

Eng. Dheya Tawfiqi is a well known engineer in Bahrain and the region. He is a Civil Engineer, holds M.Sc and currently doing his Ph.D. Mr. Tawfiqi was the president of Bahrain Society of Engineer form 1996 till 2002. Currently he is a Consulting Engineer managing his own firm. Previously he worked at Bahrain International Airport for 20 years responsible for Airport projects. He is also very interested in management subjects and published a book in Managerial Skills. Mr. Tawfiqi is providing this service on voluntary basis.
